

Transform industrial operations to grow with speed, simplicity, and less risk

Take your manufacturing firm to the next level using GROW with SAP

Streamline production by building on a cloud ERP foundation

Today's industrial manufacturing companies face intense pressure to innovate faster than the competition while managing complex supply chains and production processes. To meet these challenges, organizations like yours must leverage real-time data to optimize production, reduce waste, and respond quickly to market changes.

Boost efficiency, innovation, and responsiveness

Adapting to these demands requires a robust, flexible ERP solution that supports real-time data integration, advanced analytics for production optimization, and streamlined supply chain management.

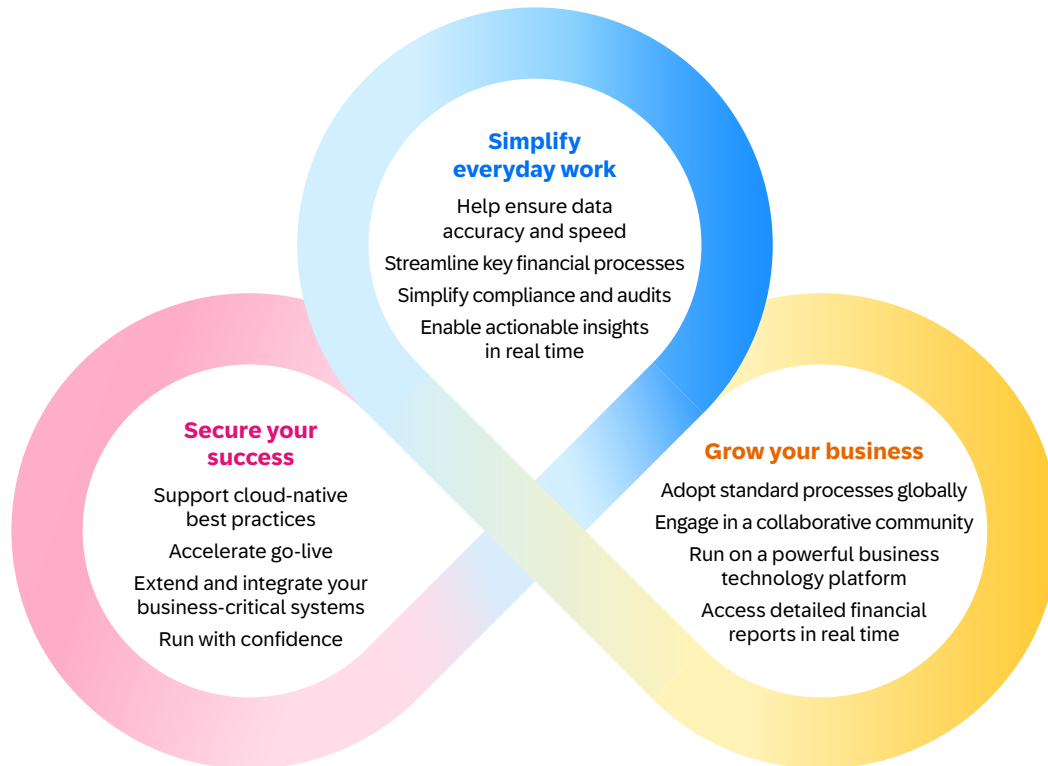

GROW with SAP provides a comprehensive solution tailored for the complexities of industrial manufacturing. It offers cloud-native ERP capabilities along with support for industry best practices, rapid adoption services, and a

collaborative community for continuous learning and innovation. Its foundation is SAP S/4HANA Cloud Public Edition, a scalable, efficient, ready-to-run cloud ERP solution (see the [figure](#) on the next page).

Using GROW with SAP, your team can achieve new levels of operational excellence. The solution offers AI-driven insights that enhance automation, improve decision-making, and strengthen compliance and risk management.

Figure: How GROW with SAP meets your manufacturing challenges

Simplify and accelerate everyday work

Innovative technologies increase agility

GROW with SAP empowers manufacturing efficiency using automated processes driven by an integrated cloud ERP solution. Centralized data reduces complexity and helps ensure consistent information across the organization, enabling accurate reporting and faster compliance checks.

You can streamline day-to-day operations and support continuous improvement activities using GROW with SAP.

Operations remain agile, allowing your business to make timely, informed decisions. Automated features also accelerate production planning and improve compliance with manufacturing standards.

Advanced analytics offer production insights that help you optimize operations and resource allocation. The solution's automation capabilities let you respond rapidly to market demands and support proactive maintenance scheduling.

Strengthen competitiveness
with automation and insight.

Grow your business

Best practices help manufacturing operations scale

GROW with SAP helps you scale operations by adopting global best practices, enabling compliance, and simplifying your entry into new markets.

Preconfigured capabilities allow quick starts, while templates rooted in decades of industry experience help you adopt effective manufacturing practices. These features meet industrial manufacturing requirements and support your processes.

To facilitate expansion into new regions, GROW with SAP helps ensure compliance with international accounting, tax, trade, and e-invoicing regulations. The solution accommodates multiple currencies and languages.

It also helps you manage mergers and acquisitions effectively without needing separate management systems. You can use these features to drive growth and introduce new products or services.

Expand operations and scale sustainably.

Elevate strategic manufacturing capabilities

Advanced features empower your operations

As your manufacturing processes evolve, GROW with SAP frees your team to focus on strategic initiatives by automating routine tasks while scaling operations to meet advanced requirements.

Real-time data supports dynamic planning and forecasting. The solution includes AI-enabled tools for visualization, predictive analytics, and simulations. It also enables integration with IoT devices and sensor networks, enabling predictive maintenance and helping you reduce downtime and maintenance costs.

Interactive dashboards offer immediate operational insights for faster, smarter decision-making. Your team can use powerful analysis tools for scenario planning and performance evaluation while sharing critical insights across your organization.

Prepare your business for the future. GROW with SAP equips your manufacturing team to advance confidently into new operational territories.

Strategically advance your manufacturing operations

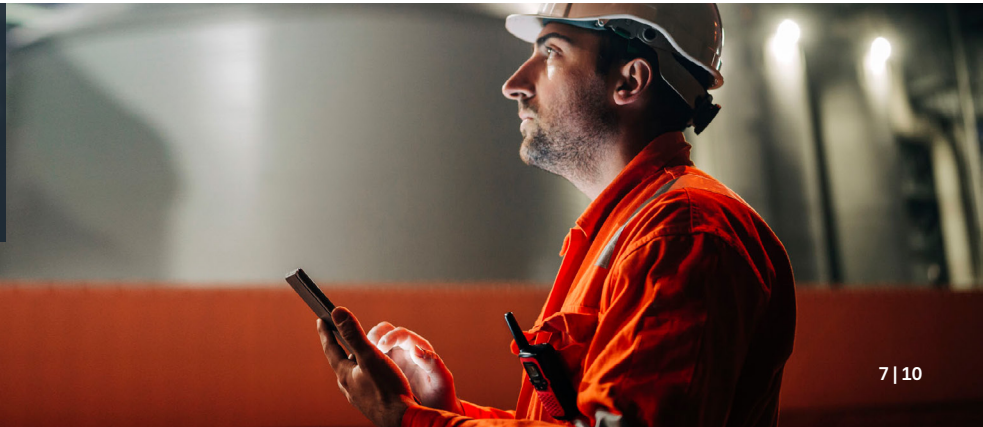

As manufacturing becomes increasingly complex, GROW with SAP helps you scale your operations efficiently. Financial tools help users orchestrate activities, while the solution manages multiple standards and currencies to support compliance and facilitate global operations.

GROW with SAP extends your capabilities with advanced features for governance, risk management, and compliance; subscription management; sustainability reporting;

and treasury management. What's more, the solution's cybersecurity features help protect your operations.

The embedded AI technologies in the Joule copilot help detect anomalies and automate responses, reducing redundancy and enhancing efficiency. These intelligent capabilities optimize resource management and improve operational outcomes.

Equip your manufacturing operations to meet future challenges.

Secure your success

Cloud ERP helps you continuously innovate

GROW with SAP provides a reliable foundation for your manufacturing operations, promoting deployment confidence and predictability. The Accelerate for GROW with SAP approach speeds solution rollout, while flexible learning options boost user adoption.

Always-on updates help ensure your operations stay aligned with industry changes and regulatory updates. As a cloud-based solution, GROW with SAP delivers the latest innovations promptly, keeping your manufacturing operations at the forefront of industry standards and technological advancements.

The solution manages security updates continuously, helping safeguard your data and addressing emerging cybersecurity challenges effectively.

Stay prepared
for the future
using GROW
with SAP.

Meet your business ambitions with speed and predictability

Transform manufacturing with exceptional efficiency

Using GROW with SAP, you can confidently adopt cloud ERP and quickly realize the benefits of SAP S/4HANA Cloud Public Edition in your manufacturing operations.

GROW with SAP offers:

- **Rapid implementation and easier adoption** of innovative cloud ERP
- **Scalability** to adapt to changing market conditions and business requirements
- **Support for business expansion** with preconfigured processes and industry best practices
- **Increased visibility and control** over business operations through real-time, AI-enabled insights
- **Enhanced operational efficiency and productivity** by accelerating core manufacturing processes
