1 SAP Project and Resource Management

SAP Project and Resource Management has the following capabilities:

- Project management
  The project management capability offers a business network for the execution of cross-company projects. You can set up a project and invite project partners (companies) from various disciplines to collaborate on the project.
- Resource management
  The resource management capability supports you in the efficient use of your human resources.

Licenses

Please note that the feature scope depends on your subscription license. For further information, please contact your SAP Account Executive.

About This Document

The feature scope description shows you which features are provided with SAP Project and Resource Management. In addition, this feature scope description also defines the product documentation for SAP Project and Resource Management.

Product Documentation

The following product documentation is available for SAP Project and Resource Management:

- This feature scope description
- Information on setup, configuration, operation, and security

2 Key Features

The following sections list the features of SAP Project and Resource Management.

2.1 Project Management

Feature	Description
Manage Projects	Create projects and invite business partners for different roles from different companies to collaborate on projects.
Manage Account	Configure and manage users and onboarding settings for your company account.
Manage Company Profile	Manage your company details and enable company visibility for invitations into projects.
Manage User Profile	Manage your user details and enable personal visibility for invitations into projects.
Manage Authorizations	Manage users and user groups and authorize them to perform various functions in a project.
Manage Documents	Manage and share project-related documents within a cross-company collaboration project.
Manage Project Plans	Create project plans to manage breakdown structures of a project.
Import and Share Project Plans	Share, connect, and coordinate project plans from different project partners in a cross-company project environment.
Manage Financial Plans	Plan quantities, costs, and revenues across the overall project lifecycle.
Manage Tasks	Coordinate the execution of tasks in a cross-company project environment.
Manage Issues	Manage issues that affect the completion of a task, goal, or activity in a collaboration project. Share issues with project partners in a project.
Manage Digital Twins	Manage digital representations of physical entities related to a project, for example, a building or bridge.
APIs	Access business objects and perform various functions in a project using the public APIs for project management. The APIs for project management are available only for customers with a commercial subscription. Freemium customers can't use the APIs.
Related Objects	Reference business objects in a project with objects in business systems that are outside project management.

Feature	Description
Integration with an enterprise resource planning system	Supports the integration with an enterprise resource planning system (currently SAP S/4HANA Cloud) to enable users of the enterprise resource planning system to directly navigate to apps in project management.

2.2 Resource Management

Feature	Description
Request resources for projects	Requesters can request resources for projects, specifying the required skills, the time period, and a description of the project, for instance. They can also track the progress of the staffing process.
Find and staff resources	Resource managers can find suitable resources and assign them to resource requests.
Monitor utilization of resources	Resource managers can monitor the utilization of their resources and refine their assignments.
Maintain profile	Project team members can maintain their project experience and skills in their personal profiles. They can also keep track of their utilization.
Stay informed about assignments	Project team members can get a graphical overview of their assignments to check which of them are scheduled for a particular day.
Integration with an enterprise resource planning system	Supports the integration with an enterprise resource planning system (currently SAP S/4HANA Cloud) to enable users of the enterprise resource planning system to exchange data with and directly navigate to apps in resource management.

Videos Hosted on External Platforms

Some videos may point to third-party video hosting platforms. SAP cannot guarantee the future availability of videos stored on these platforms. Furthermore, any advertisements or other content hosted on these platforms (for example, suggested videos or by navigating to other videos hosted on the same site), are not within the control or responsibility of SAP.

Beta and Other Experimental Features

Experimental features are not part of the officially delivered scope that SAP guarantees for future releases. This means that experimental features may be changed by SAP at any time for any reason without notice. Experimental features are not for productive use. You may not demonstrate, test, examine, evaluate or otherwise use the experimental features in a live operating environment or with data that has not been sufficiently backed up.
The purpose of experimental features is to get feedback early on, allowing customers and partners to influence the future product accordingly. By providing your feedback (e.g. in the SAP Community), you accept that intellectual property rights of the contributions or derivative works shall remain the exclusive property of SAP.

Example Code

Any software coding and/or code snippets are examples. They are not for productive use. The example code is only intended to better explain and visualize the syntax and phrasing rules. SAP does not warrant the correctness and completeness of the example code. SAP shall not be liable for errors or damages caused by the use of example code unless damages have been caused by SAP's gross negligence or willful misconduct.

Bias-Free Language

SAP supports a culture of diversity and inclusion. Whenever possible, we use unbiased language in our documentation to refer to people of all cultures, ethnicities, genders, and abilities.
